Usability Test: **App for CS262, Commit**

Fall, 2023

Jaden Brookens, Palmer Ford, Alex Miller, Ellie Sand, and Sydney Sonday

Introduction

Thank you for agreeing to do this usability test for our app, Commit. Our team would like to see first-hand what it's like for real people to use the app, which we hope will help us improve the app.

We're testing the app, not you. You can't do anything wrong here. We want to hear exactly what you think about the app. Be honest and don't worry about hurting our feelings. That will help us find problems that exist and will help us fix them.

For the test, we'll ask you to do certain tasks and we'd like you to think out loud while you're doing them. If you have questions, just ask. If you have comments, go ahead and say them. We'll record your comments, but won't make them public. If, for any reason, you'd like to quit this test, then just say so.

Background Questions

We presume that you're a CS 108 student who has used various apps before.

The Test

LOGIN--keith

1.   Reactions to the homepage – Are you tempted to click on anything? Is it clear to you what all the elements are for?

Does it make sense what the Comms on the homepage are?

2.   General tasks - I'll ask you to do some of the following tasks, depending upon how much time we have together:

        a. Can you set an alarm for 3:22 pm?
        b. Can you turn it to light mode?
        c. Can you search for a user - brenda.vl - ?
        d. Can you find how many commitments you've made and fulfilled?
        e. What day this week did you complete the most commitments?
        f. Can you set a time to turn on bedtime mode?
        g. Can you set a study timer for 1 minute?
        h. React on to someone's Comm.

3.   Final observations – Do you have any final observations on the app? Would you consider using it?

Thanks

Many thanks for your willingness to help us test our new app, Commit. The app is rather new, so we appreciate your help in fixing it up.

We'll contact you soon with a summary of what we found and how we hope to use it to improve the app. We'll keep the data from your individual session private and will only release aggregate data.
